

## WEATHER-RESISTANT OUTDOOR BATTERY CLOCKS

These weather-resistant outdoor battery clocks are specifically designed to be durable, dependable and easy to read. The movements are protected inside a plastic enclosure to prevent dust and water from getting in and to ensure problem-free operation.

The clocks operate in a wide range of climate conditions, have an aluminum dial and are available in four sizes with a black sand or steel gray finish.

This clock uses one AA alkaline battery, but purchase the additional [Battery Booster](#) and you **won't need to change batteries for 5+ years!**

- **Maintenance-free for 5+ years**
- Operates in a wide range of climate conditions
- Temperature range for battery clocks is 23°F to 122°F
- Durable steel case with powder coat finish
- Aluminum dial resists warping and cracking
- Shatter-resistant plexiglass safety crystal
- Battery Booster uses six AA batteries (*sold separately*)
