

PLASTIC LOCKERS

Try a new generation of lockers: rust-free plastic lockers.

No need for painting or rust-proofing: Lockers are maintenance free. Because they are molded as whole units, lockers have a clean and seamless smooth interior. Standard drain holes make them easy to clean: just hose them down with soap and water. Built-in sloped hoods give you extra storage space.

Featuring a sturdy double wall door, lockers will stand up to the most demanding applications in the toughest industrial environment. Their tough plastic construction makes them perfectly suited for use in food processing plants, athletic facilities or any other wet environment.

Each opening is sold fully assembled and ready for installation.

Mix and match various size units to optimize your floor space.
