

40" Lifeguard Rescue Tube.

The rescue tube that set the standard for swimming pools, lifeguards, beach fronts, and aquatic safety! The 40" Rescue Tube is one of the best all around piece of water rescue equipment available. This multi-purpose device can be used for throwing or for towing a swimmer. This rescue tube features a 12" extension strap and Delrin buckles.

Features and Benefits:

- * Tube length: 40 inches
- * 12" strap extension accommodates swimmers of larger girth.
- * Durable strap-through-tube construction extends tube life, protects tube strap from pulling out.
- * Smooth, rounded edges reduce drag in water and are crack resistant by design.
- * Extra thickness for added buoyancy gives an added boost, making swimmer retrieval easier for lifeguards / rescuers.
- * Constructed of soft vinyl-coated PVC foam and lightweight Delrin quick-release plastic buckles to increase swimmer comfort and reduce chances of injury on contact.
- * 6 foot heavy-duty polypropylene towline features an extra wide strap to reduce pull on the shoulder area.
- * * Approved by leading lifeguard trainers for use in pools, water parks, and open water.
