- 05044, 7.5' x 16' x 12cm, 110lbs**
- 05045, 8' x 12' x 12cm, 120lbs**
- 05046, 8' x 12' x 20cm, 160lbs**
- 05047, 8' x 16' x 12cm, 126lbs**
- 05048, 8' x 16' x 20cm, 213lbs**

STANDARD TRAINING PITS

05086- 05089

The ultimate in continuous high quality performance and confidence building. Our newly designed Training Pit modules contain three layers of superior grade Polyurethane foam. The top layer is a soft density foam, a medium density in the intermediate layer and a firm density foam for the bottom layer. The three layers are laminated together which provides a permanent bonding. The strategic positioning of the foam pieces in a honeycomb pattern provide the best possible shock absorption. The exterior shell consists of 19oz vinyl with coated vinyl breather side panels, which ensure proper air flow escape for safer landings. Every Training Pit has eight carrying handles for easy portability, and are available upon request with hook loop fasteners. These fasteners are positioned at the two ends of the pit on the top. When the pits are joined in series, a continuous, crackles landing surface results.

05086, 66" x 132" x 24", 200lbs

05087, 66" x 132" x 32", 250lbs

05088, 90" x 144" x 24", 325lbs

05089, 90" x 144" x 32", 375lbs
