

# AquaTrek WHEEL CHAIR

- **Totally submersible**
- **Durable and lightweight**
- **Stainless steel axle**
- **Safe and comfortable**
- **Footrest, swingarm and stainless steel handrims**

**standard**

- **Additional options are the seat belt and shoulder harness**

Uniquely designed for aquatic use, the **AquaTrek Wheelchair** can be used in and around swimming pools, spas and showers. The standard wheelchair comes equipped with a swing arm, moveable footrest and stainless steel handrims on the rear wheels. Additional options include the seat belt and the shoulder harness, which are available upon request. Constructed from furniture grade PVC and the finest stainless steel fasteners, the wheelchair is both durable and noncorrosive. The front wheels are 7-inches in diameter and the rear wheels are 24-inches in diameter. The one-piece Nylatron bushings are specifically manufactured to meet the demanding needs of the aquatic environment. The **AquaTrek Wheelchair** is totally submersible and may be used with any of the **AquaTrek Ladder, Steps or Ramps**.
